### **UNIVERSAL TUGGER ELECTRIC**

TRULY UNIVERSAL BATTERY CHANGING

The UNI-Tugger is the latest addition to our globally recognized BTE series. It is designed to accommodate all popular battery sizes and roll-out heights and is equipped with our signature electromagnet; perfect for low-volume, high efficiency battery changing. The UNI-Tugger also has built-in safety features, including a linear actuator system to supplement the lifting range.

All lift and extraction functions are electrically powered by any suitable host truck. The logical push-button controls simplify operation fulfilling the industries need for a "flexible" mobile battery changer with minimal maintenance requirements.

#### **COMPATIBLE**

Accommodating forks starting from 48"/1219 mm in length and 22"/558 mm in width the UTE is compatible with most standard pallet trucks.

#### **OFF-THE-SHELF**

The UTE's versitility makes it perfect for operations looking for a quick "off-the-shelf" battery change.

#### **AFFORDABLE**

Adaptable and competitively priced for fleets of all types.

#### **AWARD WINNING**

Nominated as a finalist in innovation and deemed reader's choice in 2022 the UTE's adaptability is the new standard in industrial battery management.

#### **FULLY ELECTRIC**

Powered by the affixed host truck, this unit is entirely electric.

#### **WARRANTY**

Every unit comes with a standard 1-year warranty for your protection and a 5-year warranty on the electromagnet.
