BATTERY HANDLING

BATTERY STANDS

CBH battery stands are customizable to suit any battery room, a specialized solution for roll-out battery-changing applications. Available in various configurations with a plethora of options CBH battery stands support all battery dimensions and required roll-out heights, tailored to meet the needs of any operation.

BRS

BATTERY ROLLER STANDS

SIZES FOR ALL APPLICATIONS

Complete range of single, double, triple and quad configurations to support all battery dimensions and roll-out heights.

ENGINEERED TO LAST

Fully welded steel construction finished in acid proof powder coat paint to withstand the harsh acid-rich environment of any battery room.

SUPREME PROTECTION

All rollers come equipped with a non-conductive polyethylene sleeve to prevent corrosion and electrical conductivity.

LEVEL WHEN YOUR FLOOR ISN'T

Simple to adjust, 1" diameter support legs, allow for incremental adjustment to compensate for unlevelled floors and safely support extreme loads.

UNMATCHED SAFETY

All models feature integrated rubber back stops and front safety stop latches to ensure efficient yet safe battery storage and security.

FULLY INTEGRATED OPTIONS

A huge range of options allows flexibility to meet your changing needs. Add a charger shelf to allow easier charger access or a pogo stick to safely control charger cables. You can also add a back enclosure to create positive fume extraction or a drip tray to safely collect corrosive acid spills.

CUSTOMIZABLE
COLOUR

- ✓ Optional drip trays
- ✓ Single to quad configurations
- ✓ Adjustable roller height
- ✓ Integrated bump and safety stops
- ✓ Complete battery room package available
- ✓ Low to high volume
- ✓ Fully welded charger shelves are available with flexible mounting supports
- ✓ Ventilation design and kits for direct gas extraction
- ✓ Polyethylene drip trays
- ✓ Integrated cable management systems
- ✓ Custom widths and depths to suit special battery sizes or unique space requirements

OPTIONS AT ADDITIONAL COST

- ✓ **CL** - Custom Length roller stand
- ✓ **EH** - Custom Height rollers
- ✓ **ETH** - Custom Height charger shelf
- ✓ **DTSA** - Drip Tray Rails to support acid drip trays
- ✓ **DT** - Drip trays
- ✓ **Note:** Standard roller stand foot is threaded bolt with +/- 1" height adjustment.
- ✓ All roller stands must be fitted into retaining channel (Part # RC-01)

Carney Battery Roller Stands are industry standard, known worldwide for premium construction and durability. Each roller stand is manufactured to custom specifications which allows operations to match the height of their lift truck battery compartment. We start with heavy premium gauge structural steel, laser cut to our specifications to support our unique polyethylene-coated, acid-resistant roller system. Each stand has a comprehensive range of options, including integrated drip trays, charger shelves, direct ventilation, and cable management systems. Available in a full range of widths, depths, and roll-off heights, CBH can offer a matched stand for any application, no matter how unique.

SINGLE ROLLER STAND

MODEL	BFR	OW
Min SRS -12	12"	15"
Max SRS-48	48"	51"

DOUBLE ROLLER STAND

MODEL	BFR	OW
Min DRS -12	12"	27.25"
Max DRS-36	36"	75.25"

TRIPLE ROLLER STAND

MODEL	BFR	OW
Min TRS -9	9"	30.5"
Max TRS-27	27"	84.5"

QUAD ROLLER STAND

MODEL	BFR	OW
Min QRS -9	9"	40"
Max QRS-21	21"	88"
